Re: ILI Run

Dear Peter,

Peak Midstream Goldsboro manages Norfolk Southern Railway's 6" 5.62 mile jet fuel pipeline regulated by PHMSA supplying the Seymour Johnson Air Force Base in North Carolina. Obviously, most of the operations at Seymour Johnson Air Force Base (SJAFB) in NC are confidential and secretive but is known as a major Air Combat Command (ACC) installation that includes the 4th Fighter Wing and the 916th Air Refueling Wing

Changing vendors on a critical process is never easy and requires a great deal of homework to ensure that we wisely move in a positive direction. After receiving ILI proposals from numerous vendors, we performed our due diligence and selected Cypress EcoVision™ technology ILI over the prior legacy vendor that performed the last two inspections of our pipeline with a non-UHR legacy tool, and another competitor that offered tri-axial technology that upon further diligence, was not a viable alternative to what Cypress offered. We liked the Cypress technology, management team, technical knowledge/experience, professionalism and the owner's personal involvement to win our business. The prior inspection of our pipeline five years ago resulted in several anomaly calls that led to multiple confirmation digs for verification that required time, resources and money thus we were focused on a selection that would yield accurate data.

Additionally, for this inspection, we desired precision given the strategic importance of this pipeline and also to update location data. The week of the inspection we had a logistical challenges with our fuel delivery and had to postpone the run for a week after Cypress had mobilized their team to the job site. The Cypress leadership team remained committed, cooperative and understanding and was available evenings and weekends to work with us on this unanticipated issue caused by the fuel supplier. The Cypress team including the level 2 technician, worked 60+ hours to meet our new schedule, after demobilizing from another client's project to complete ours. Despite some more last-minute scheduling challenges, we had first run success and 100% coverage.

The Cypress team was informative, very professional, organized and great to work with from the first phone call! I am pleased to serve as a reference and satisfied customer.

Sincerely

Michael Turchi
